General Manager's Message

Tawreek Dimensions Establishment (TDE) was established in 2002 as a general contractor in Riyadh Saudi Arabia, and soon became a significant participant in construction and maintenance services with projects all over the Kingdom. TDE has been providing construction services to a long list of new and existing clients for several years.

TDE has participated in several projects as sub-contractor, and occasionally as the main contractor for National Guard, RSAF, KAFD, KFMC, SEC and several Governmental Departments and Commercial Organization. A hands-on approach to the business has given TDE an edge in being able to make decisions quickly and to adapt to the requirements of our clients.

TDE offers to perform all forms of installations, construction, plant shutdown repairs, refurbishments and planned maintenance services for structural, mechanical and electrical equipment. Our technical teams present a solution that is highly responsive and flexible, with a uniform commitment to the safety, quality and efficiency.

TDE's presence in the region such as Jeddah, Hafoof, Dammam, and Buraidah is a standalone factor to demonstrate our dedication, as it allows us to offer a continuity of the project for our clients as well as our maintenance teams could dedicate all their skills as well as time to the shared goals of our organization. These regional satellite branches are supported by our Head Office based in Riyadh.

All our construction and maintenance activities are supported by the technical services, civil and electro-mechanical works, reliable engineering, failure analysis and predictive maintenance.

TDE Est. offers you expertise in job management, competitive pricing, and on-time delivery to make your construction experience stress-free. Please contact us today to discuss your upcoming projects. TDE is well equipped for 2017 and beyond. Not only does the group have the supply and demand, but also the merit and accreditation to further its market competitiveness.

Abdallah A. Al-Otaibi

General Manager

OUR MISSION

TDE Est.is committed to building long-term relationships based on integrity, performance and value, as well as client satisfaction. We continue to meet the changing needs of our clients with our quality services delivered by the most qualified people.

CORE VALUES

Team Work

We recognize our primary asset is our people. To be successful, TDE Est. is a rewarding place to work. We provide opportunity and encouragement to help our staff reach their potential. We work with our clients as a team, where mutual respect provides the foundation for the success.

Integrity

We remain true to our founding values of quality, honesty and hard work. TDE Est.is a business based on trust. We are consistently associated with high standards of service, quality and personal attention to our client's expectations.

Commitment

We are proactive in finding solutions for our clients that best achieve their goals. Lasting relationships are the lifeblood of our business. We want the client to feel that our staff is even more committed to the effort than their own staff. That's what distinguishes us. We commit personal attention to our clients as individuals and genuinely care about them as friends.

We Believe That:

- Our people are our greatest asset and the key to our success.
- We must attract outstanding people who take pride in their work.
- Our people must have information on matters that affect them.
- Adequate job training must be given to employees.
- Competent and enthusiastic supervision is essential.
- Efforts must be rewarded with opportunities for advancement.
- Fairness and integrity are the part of all employee-related decisions.

CLIENT PORTFOLIO

TDE has a diverse portfolio of customers in the governmental-industrial, commercial and private clients. Public companies and governmental agencies kingdom wise and abroad select TAWREEK DIMENSIONS CONTRACTING EST. as their partner in the most challenging and complex projects.

Because of our reputation for reliability, we are proud of the fact that many of our clients come back to TDE or have referred their associates to TDE. We have a proven reputation for on-time delivery within the specified and agreed budget. With the several successful projects, we have the experience, resources and credentials to meet the most demanding requirements. Our staff is familiar with the standards, specification, QA/QC and HSE requirements while working with multinational companies and departments of the government. We worked for the following reputed companies and organizations as a subcontractor and occasionally as the main contractor.

HEALTH, SAFETY AND ENVIRONMENT (HSE)

TDE believed that the perfect success must come along with the safety of the employees and all participating people. Safety is not only a law or regulation, but it is also a matter of righteousness and humanity, a right, which all co-workers must receive. Thus, the safety is considered a valuable thing for our organization to be practised and continuously perpetuated. We have a comprehensive LPP program, as well as we provide regular EHS training to our staff. The Executives and staffs are assigned for the responsibility of the safety in accordance with their respective part of work.

Safety Policy:

TDE has set forth safety policy on all staffs as follows:

- The company shall enhance and create work safety.
- The company considers that all work performers are valuable resources of the company; hence, the safety of the work performers is the important policy of the company
- The company shall render support in order to create work safety and provide equipment and appliances with safety condition including condition and method in operation.
- The company has prescribed its policy that there shall be a Health Safety and Environmental Committee to map out work and project planning in connection with the safety as well as carrying out the management and development the project plan to efficient success
- The company has prescribed it a policy that all superiors have the duties and responsibilities on the matter of work safety of their subordinates in strict compliance with the safety rules and regulations prescribed by the company for any specific task.
- The company has prescribed it as a policy that all work performers have the duties and responsibilities for their own work safety as well as the safety of their co-workers in strict compliance with the safety rules and regulations prescribed by the company.

Key Elements of Safety Plan:

- Company health, safety and environmental policies.
- Safety training program for all staff positions.
- New employee orientation and training program.
- Safety promotion and incentive program.
- Job safety analysis (JSA) program for all major and high-risk works.
- Accident investigation and reporting system with follow-up corrective measures.
- Accident statistics and analysis.
- Preparing work method statement and accident prevention method.
- Safety audit and inspection.

TDE supervises all levels of the employees by holding regular safety talks at job sites to provide knowledge and comprehension in performing their work relating to health, safety and environmental conditions both from their own sites and other sites.

QA/QC POLICY

TDE Est, as a leading Construction Contractor in all aspects of engineering, has adopted a policy to ensure the implementation and maintenance of a Quality Management System. To meet the standards of the international market and to enhance our QMS, we have a well-maintained Quality Management System with **ISO 9001:2015**. This system is checked and keeps updated regularly to improve the performance of our products and services. Our QMS is our competitive edge that ensures our unique identity in the market.

The quality objective of TDE is to continually improve overall performance so that customers can be provided with the service that ensures safety, reliability and value in all contracts undertaken by the company.

It is our belief that our Customer Quality requirements can only be attained through the active involvement of all employees both within the Company and those assigned to the project. Also, this is achieved by continuous improvements in the QA/QC systems to meet the standards of work.

Due to the goals set above, our commitment to the quality is achieved through accurate and on-point training, expertise, planning, techniques, supervision and attitude to building a quality product for our customers.

The manager of quality and safety have the authority and organizational freedom to identify quality deficiencies. After the identification, it is his/her duty to initiate, recommend, or provide solutions, and to verify the implementation of quality systems.

The quality manual, procedures and quality plans form the "keystone" of TDE Principle, to hand over a quality product built in accordance with codes, specifications and clients engineering practices.

The Company Quality Management System is a fundamental in the training of all employees and during the induction of new employees. This ensures that this policy is understood, implemented and maintained at all levels of the organization.

It is our policy that only top-quality work is turned over to the client, and to ensure that all necessary steps are taken to meet all standards and local regulations implementation.

The acceptable work classified as quality for us includes:

- Quality control function Inspection.
- Testing & Examination.

The quality assurance program, based on the requirements of our key sectors, ensures that all work is completed to the highest technical standards based on the customer specification and design requirements.

To administer the quality control activity, the in-charge along the QA/QC person will study the complete scope of work and requirements of the projects; this will involve the preparation and instructions for each activity. The complete function is divided into two phases.

Phase-1 Material

On receipt of the work order and documentation by the in-charge & QC personnel, we notify our vendors, through our procurement staff, to commence the procurement/delivery of critical material to begin work followed by the remaining materials to be stored in our workshop.

We perform all QA/ QC functions to ascertain that all work is performed in accordance with the standards and code of practice. Our supervising engineer will provide the customer's engineer with a schedule covering each week. Q.C. activities advance on a standard format and we provide weekly reports of Quality Control Activities.

Phase-2 Work Activity

The activities are controlled in the following fashion:

QA/QC person will periodically check and implement QC models. The in-charge of work is briefed about the salient features of each work and a checklist is prepared for their guidance.

The QC Activities in general, performed by our QC group, is as follows:

- Meeting the specifications during work.
- Only technically acceptable items are used and installed correctly.
- Control of the orderly collection and retrieval of all documentation of customer and our material.

TRAINING

Having top-quality staff is an area where TAWREEK DIMENSIONS Contracting Est. takes considerable pride and investment; in this year's first quarter alone, the company provided training of our technical staff for the latest technologies.

TAWREEK DIMENSIONS Contracting Est. provides a number of bi-annual classes, which are taught by industrial professionals. They include practical, reality-based applications covering safety training, regulatory training, management skills and construction knowledge.

TAWREEK DIMENSIONS CONTRACTING EST. is committed doing it right the first time and not taking shortcuts that will reduce the project's quality; this means employing the right kind of people with the right knowledge: to better educate its people and better educate its bottom line.

The company is acutely aware that training is paramount and the key to success and safety in the industry, and provides a wide number of internal training opportunities. TDE has a comprehensive safety program which fully complies with the Occupational and Safety Health Administration (OSHA) requirements for workplace safety.
